MARCANTO 170 Oak Weiss

THE INNOVO NATUR OIL SURFACE.

# Beautiful & so easy to maintain

Naturalness that is evident with every step - the latest trend in parquet flooring. Beautifully smooth oiled surfaces, in which every pore can be seen. However, the floor must still be hard-wearing and capable of meeting the challenges of everyday life.

tilo macht den Boden, whatever your plans. Which is why our customers benefit from the exclusive Innovo Natur Oil surface from tilo. It combines the tangible naturalness of oiled surfaces with the hard-wearing and easy to maintain characteristics of varnish.

Uncover the innovative genius of tilo in two special collections:

- **PURISTICO 170**
- **MARCANTO 170**

You will also find our Innovo NATUR Oil surface in the showrooms of our partners - look out for this symbol:

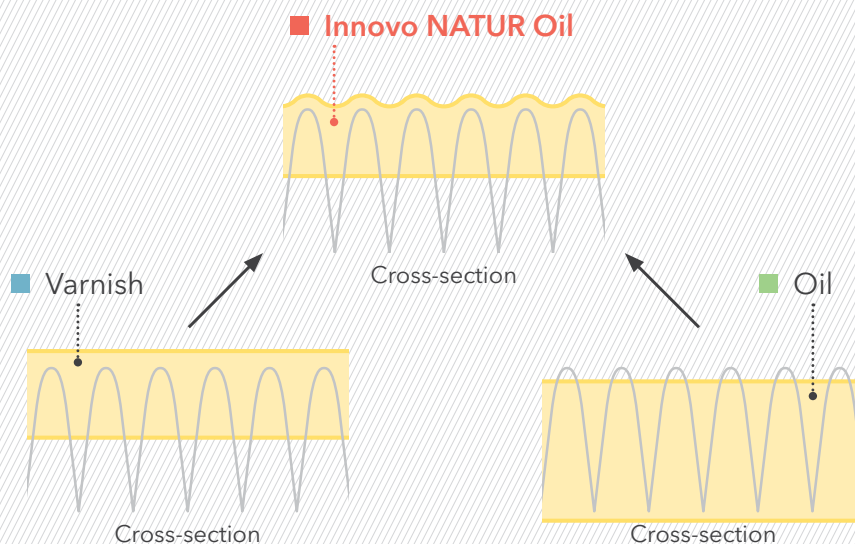

tilo makes

# the perfect combination.

Surface treatments protect the bare wood, change its appearance and affect its functional properties and the type of care it will require. No surface treatment is ideally suited to every possible type of use. Every customer will use their floor for particular purposes and those types of use will be the decisive factor when determining the “right” surface treatment in each case. Information regarding the proper-

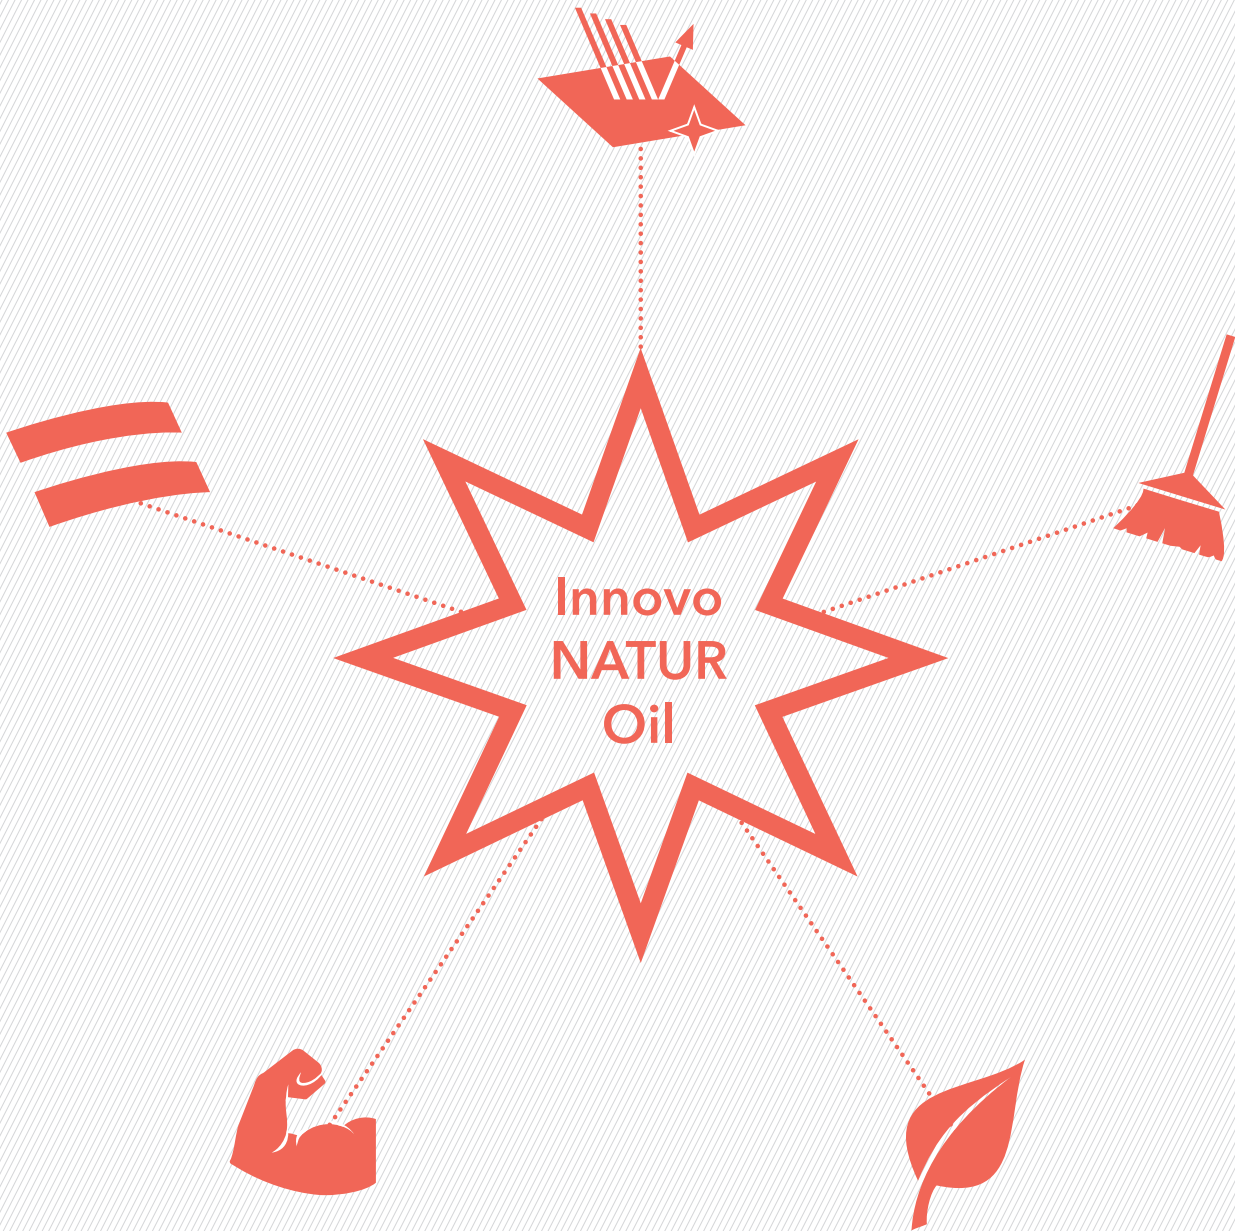

ties of the various treatments will help customers make the right decision for each application. tilo has created something really special with its Innovo NATUR Oil, as it combines the main advantages of both oil and varnish. The result: floors that are not only beautifully smooth and feel natural to the touch, but also hard-wearing and easy to maintain.

Here's a comparison of the surface cross-sections:

- The varnish creates a sealed protective film over the surface of the wood to provide the best possible protection against damage.
- Oil penetrates into the pores in the wood, creating a natural appearance where the pores predominate.
- The Innovo NATUR Oil surface penetrates into the pores in the wood and at the same times creates a sealed film over the surface, making it extremely hard-wearing while retaining its natural appearance.

The logo for 'tilo' is displayed in a bold, black, lowercase sans-serif font within a yellow square.

There's more to the Innovo NATUR Oil developed by tilo than first meets the eye. No wonder it's a leading light among surface finishes.

# The Innovo NATUR Oil

# Advantages

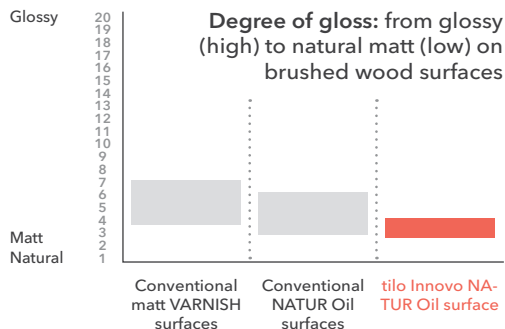

## Elegant matt finish

The Innovo NATUR Oil on your floor is not visible. The grain is clearly emphasised, the surface remains matt and natural. Compared with conventional matt varnishes and NATUR oils, the degree of gloss of our surface has to be seen to be believed.

## Hard-wearing

Innovo NATUR Oil forms a deep, protective layer. The floor becomes more resilient and exhibits a high degree of resistance to scratches, scuffing and abrasion.

## Developed in Austria

We are familiar with the subject of flooring "from the ground up" and know what has to be done to get the best out of wooden materials. Innovo NATUR Oil is the result of years of expertise and passion from the heart of Austria.

## Quick and easy to maintain

Innovo NATUR Oil penetrates the wood, hardening as it does so. Dry and wet cleaning can be performed without any problems. The floor can be walked on after just 6 hours (instead of the usual 24 hours) and cleaned without having to use any special machines.

## Natural

The oil is 90% natural raw materials and has been tested by and conforms to ÖNORM standards. Innovo NATUR Oil is the perfect way of obtaining long-lasting, beautiful and resilient flooring.

PURISTICO 170 Oak Natur

SHOW YOUR COLOURS.

# PURISTICO 170

Serene gradings are currently all the rage. tilo has brought the most popular gradings together to form a dedicated collection, which we've rounded off with the Innovo NATUR Oil surface.

Consider the serene beauty behind our floors in a new light. From light to dark, 5 contemporary colour variations create a new dimension: let your thoughts run free and discover unimaginable possibilities.

tilo makes living spaces  
**harmonious.**

**Stairs are so much more than “just” the transition between two levels.** They act like a piece of furniture and have a significant influence over the atmosphere within a room. Tilo’s matching stair coverings and skirting boards create a harmonious overall look, which extends throughout your entire home.

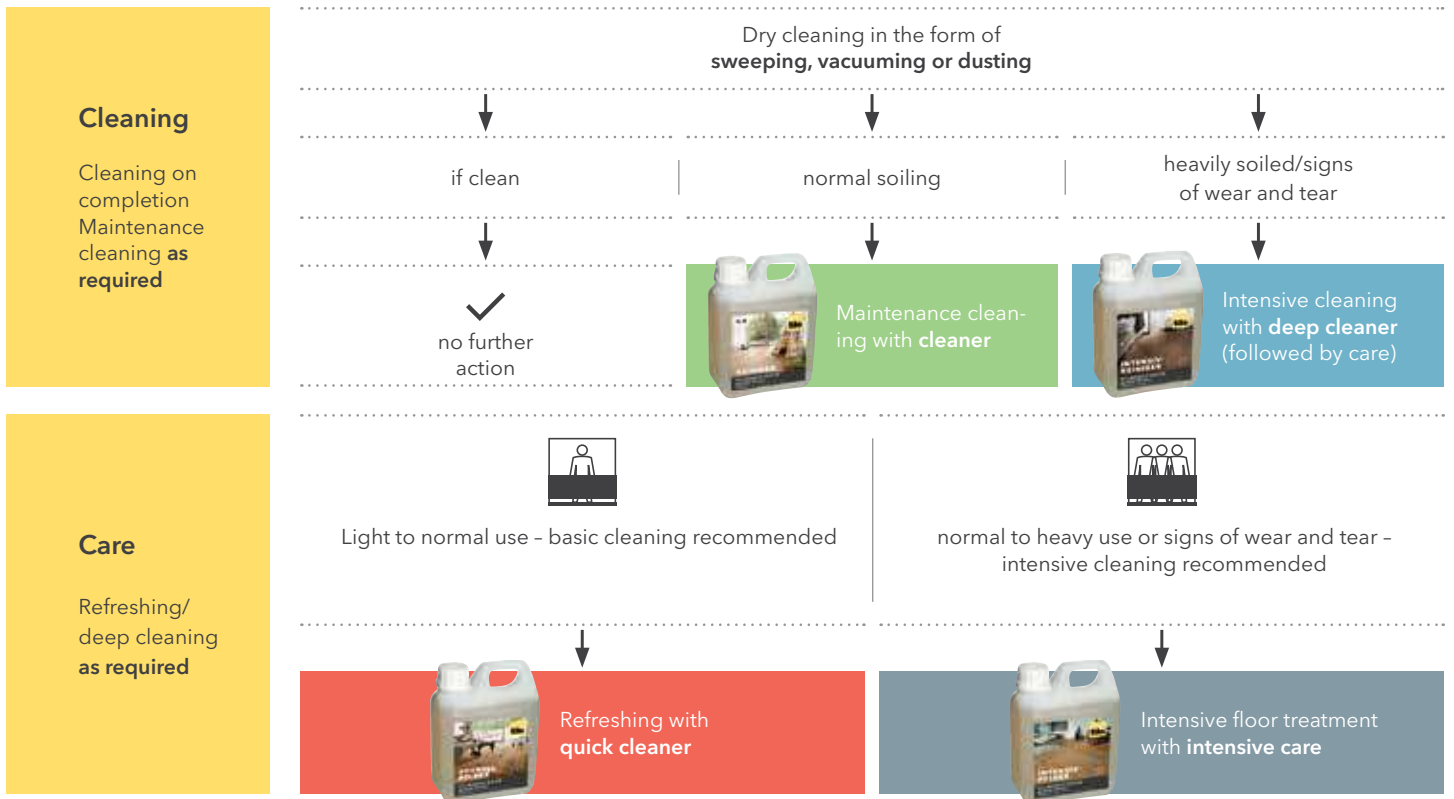

Having the right skirting board may seem like a tiny detail, but it can have a major impact on the overall effect of your rooms. With a matching skirting board from tilo, your interior style will shine through in every corner of your home.

# Floor care is now **even easier.**

The right cleaner ensures that you retain the quality and pure beauty of your tilo floor. They are kind to the surfaces, have a revitalising effect and make your floors look as good as the day they were first laid. We have the right cleaning and care product for your Innovo NATUR Oil surface.

## Cleaning and care

### Why Innovo NATUR Oil makes such an impression when caring for your floor!

- Easier cleaning and care: The Innovo NATUR Oil quick cleaner is applied with a mop and dries in just 30 minutes
- Simpler intensive cleaning and care using a mop - no machines required
- Intensive care with improved drying properties of around 6 hours (previously up to 24 hours with Vital NATUR Oil intensive care)
